ABOUT US

Together towards road safety. That is what TTI Partners is standing for. Innovative products combined with a user friendly interface to give the ultimate protection on the road. Everywhere, at any time.

Our experienced employees will have a solution for every project. With our basis model as reference point TTI Partners is able to deliver flexibility for every custom fit. Every project deserves the right product! Our distributors are located through Europe and abroad. Together towards worldwide road safety with TTI Partners.

TTI Partners was founded in 2016 as an initiative from Veth Automotive and Van Den Born Carrosserie. The first product, the self developed TACTIC Dynamic, has been used by a lot of companies after a succesfull test with the Dutch road manager Rijkswaterstaat since then. After Rijkswaterstaat, the Province of Gelderland and a number of governments and other companies also decided to opt for the TACTIC. The products of TTI Partners are obtainable by selected partners.

The product assortment has been extended with the TACTIC Smart and TACTIC Visual in 2020. With this extension TTI Partners is able to deliver the right solution for every target group in multiple branches.

TACTIC SMART

RVS AND ALUMINIUM CASE
FULL COLOR LED - DISPLAY - 2560 PIXELS
USABLE BY TOUCHSCREEN OR/AND TABLET

TACTIC DYNAMIC

INTEGRATED OPTICAL SIGNALLING
FULL COLOR LED - DISPLAY - 2560 PIXELS
ROTATABLE UP TO 45° TO THE LEFT OR RIGHT

TACTIC VISUAL

INTEGRATED OPTICAL SIGNALLING
FULL COLOR LED - DISPLAY - 6400 PIXELS
INTEGRATED WARNING LIGHTS AND REFLECTING TAPE

DISTRIBUTORS

Worldwide roadsafety. Our strong network of distributors offers an excellent worldwide obtainability. From Europe to the Middle East, the products of TTI Partners are available in every part of the world.

TACTIC SMART

A self developed traffic information system by TTI Partners. Without optical signalling and turning option, but with the latest generation LED-Display for the ultimate visibility. The TACTIC Smart is the reliable choice for a high quality Dynamic Route Information Panel (DRIP). Tested extensively to guarantee the best quality and produced according the EN12966 norm.

The TACTIC Smart is a multifunctional employable traffic information system which improves the communication between safety vehicle and road user. With the sharp contrast of the latest generation LED-Display messages will be send fast and clear. The solid frame, made of RVS and Aluminium, is giving the product a long life time. Because of the light weight system the TACTIC Smart is produced within the permissable roofload of car manufacturers. The vehicle independency of the TACTIC Smart is giving the product multiple goals for different branches.

The TACTIC SMART meets the following specifications:

- DRIP*
- Vehicle Independent
- Usable by touchscreen
- Driveable up to 130 km/h with operational display
- Maintenance friendly
- Produced according to EN12966 norm

TACTIC APP
EASY USABLE LED-DISPLAY
PERSONALISED CONTENT
USABLE UP TO 100METERS FROM VEHICLE

Besides the standard configuration, the TACTIC SMART is compatible with different options. These options are:

- Integration of other communication resources available
- Unlimited personalised texts, images and scenarios available
- 2nd touchscreen for the use of the TACTIC APP
- Emergency stop

DRIP: Dynamic Route Information Panel

TACTIC SMART

Usable for multiple goals, in multiple branches: the TACTIC Smart as a multifunctional hit. From traffic information display to marketing tool, this system uses a wide range of target groups.

TACTIC DYNAMIC

The TACTIC Dynamic is a self developed mobile, variable traffic information system that consists of a LED-Display with integrated optical signalling. The system is able to respond fast and accurate in a changing traffic situation. The ultimate visibility with the Fend-Off position and the light weight frame made of RVS and Aluminium are the basis of this product.

To guarantee road safety in all conditions, the product has been developed on the basis of the core values safety, user friendly, functionality, flexibility, durability and a low maintenance level. The system is usable by a mounted touchscreen into the cabin or a separate tablet. All functions of the TACTIC Dynamic are usable by using just one panel. De user takes advantage of an accessible worksituation.

The TACTIC Dynamic meets the following standard configuration:

- DRIP* and amber optical signalling in one
- Vehicle independent
- Turnable up to 45° to the left or right
- Usable by touchscreen
- Driveable up to 130 km/h with operational display
- Maintenance friendly
- ABS Cover
- Produced according to EN12966 norm

TACTIC APP
EASY USABLE LED-DISPLAY
PERSONALISED CONTENT
USABLE UP TO 100METERS FROM VEHICLE

Besides the standard configuration, the TACTIC DYNAMIC is compatible with different options. These options are:

- Blue optical signalling
- Direction indicators
- Traffic Advisor
- Alley Lights
- Integrated GPRS/GPS router for real-time view at emergency room
- Unlimited access to images, texts and scenarios
- Optical signalling used by hard buttons in cabin
- 2nd touchscreen for the use of the TACTIC APP
- Emergency stop
- Personalised cover

DRIP: Dynamic Route Information Panel

TACTIC DYNAMIC

Our product has been used in the Netherlands as well as in foreign countries to improve road safety all over the world. In cooperation with our selected partners TTI Partners is working towards a worldwide availability of the system.

TACTIC VISUAL

Ultimate visibility because of the big LED-Display and reflecting tape: the TACTIC Visual is developed by TTI Partners for multiple goals. The integrated optical signalling in combination with the warning lights will create the optimal visibility. The TACTIC Visual can be used for multiple goals: from incident management to transport guidance, from event information to traffic information.

The traffic information system with integrated optical signalling, but without turning option, will take care for the display of a clear message on the big screen. The light weight frame made of RVS and Aluminium are giving the product a long lifetime and low level of maintenance. The cover, made of aluminium, will protect the product from outside. Because of the reflecting tape and warning lights the product meets the BF3 and BF4 regulations which makes the product employable in Germany as well as in other countries.

The TACTIC VISUAL meets the following specifications:

- DRIP* and amber optical signalling in one
- Vehicle Independent
- Usable by touchscreen
- Driveable up to 130 km/h with operational display
- Maintenance friendly
- Aluminium cover
- Produced according to EN12966 norm
