### DSFX Lightbar

When BIG presence is required, then the DSFX Lightbar from Redtronic is exactly that. Consisting of 2 levels of lighting and a high-profile design it is very much impossible to not notice when a vehicle is nearby that is fitted with the DSFX. The DSFX Lightbar is applicable to all vehicle types but is more advantageous on those larger, taller vehicles where slim-lightbars just do not cut it and are unable to emit light good enough at a higher point and on a larger vehicle body. The DSFX is the perfect crown to complete those larger vehicles that are in the toughest of jobs where awareness to surrounding workers is key to maximise safety and reduce potentially life-threatening incidents. The DSFX comes packed with features and functions such as our commitment to strong, durable products utilising 4mm Ultra-strong UV stabilised polycarbonate outer lenses on a tough, durable aluminium base to protect the lightbar from large impact debris for the toughest of jobs. The DSFX is also paraded with multiple lens and LED module colours including Single Colour, Tri-Colour & Multi-Colour where our popular Ultra-brightest latest generation LED's are fitted behind our Wide-angle FX Optics. Multiple connection options and mounting options are available amongst many lengths. The DSFX is with no doubt a strong, durable and quality product, and therefore it is backed by a 5 Year Warranty.

#### Features and Benefits

- Wide-angle FX Optic with Ultra-bright latest generation LED's
- 4mm ultra-strong UV stabilised polycarbonate lens
- Double stacked 2 levels of lighting offers a premium 'BIG' presence
- Single, tri and multi colour options:
