AUTOMATIC PAY STATION  
AUTOMATICKÁ POKLADNA

**GP4AM**

**GENERAL DESCRIPTION**

A small automatic pay station provides a **simple solution to the collection of entry fees** or fees for other chargeable services.

The **user-friendly setting** allows the fee to be defined and paid either in coins or by a payment card. The device is equipped with a **contactless card reader** that allows the passage of employees and staff. The **Euro Lock** has also been installed in the device so it can be used by the disabled.

The pay station can accept up to 2 different currencies at the same time. The small automatic pay station offers a wide-range use, it can be installed in all types of buildings where an automatic collection of entry fees or fees for the use of services is required, e.g. **at toilets, showers, turnstiles**.

Optionally, the pay station can be extended by remote administration over the internet. The automatic pay station features a highly resistant and robust structure which prevents possible attempts to steal cash stored inside.

**FEATURES**

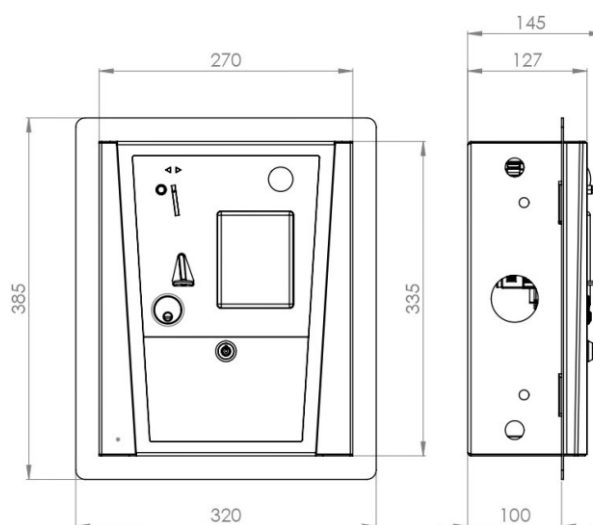

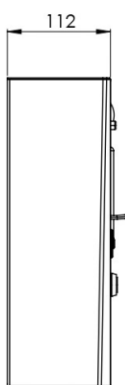

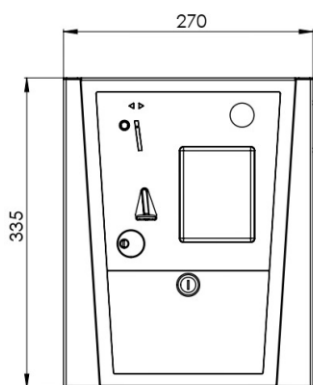

- easy to operate
- acceptance of payments in two currencies
- contactless terminal for payment cards
- reader of employee cards
- Euro Lock for the disabled
