Introduction

Your Partner for Payment Technologies

AZKOYEN Medios de Pago is a division of the Multinational **AZKOYEN** Group. Since 1945, we have been working in an increasing number of sectors, spreading to more countries and dealing with a growing number of companies. Our philosophy is based on collaborating with our customers to develop a wide range of creative, secure, technological payment systems designed with the end user in mind.

Our Commitments

1. To attend your security requirements

Mechanical and electronic thread detection system: not only does

- It prevent coin retrieval
- It detects fraud and instantly inhibits all acceptances.

DSM ranges:

- To maximise coin acceptance and fraud rejection systems.

DSM validators involve both conventional coin measurement systems and DSM recognition.

D: Digital signal processors (**DSP**) which multiply the parameters read on a coin by 10 and digitally process all the signals.

S: Sound measurement of the coin to determine precisely what materials it is made of.

M: Use of **Multimode** sensors which calculate the course of the coin in the validator and adapt their sensorization to the coin detected section.

AZKOYEN
M E D I O S D E P A G O

2. To make machine design easier

- Specific models for each country and application.
- Wide range of accessories.

3. To reduce cost

- Modular design which simplifies maintenance.
- User-friendly Tools and Software.

Standards

The entire range of AZKOYEN validators complies with the following standards:

- **CE**
- **Rohs**
- **BACTA standards**

Your Partner for Payment Technologies

Modular AC6

3.5" front-return validator

BENEFITS AND ADVANTAGES

- Electronic thread detection system
- Mechanical thread detection system.
- Versions available for each country
- Easy to maintain
- Versatilidad to minimise space on the front of the machine.

Modular validators **AC6**

3,5"

Coin Management

AC6**Mechanical Characteristics**

Coin Acceptance	32
Token Acceptance	2
Coin inhibition	✓
Coin diameters	16.25 mm - 32.5 mm
Coin thickness	1.2 mm - 3.3 mm
Dimensions	89 x 46 x 102 mm
Degrees of inclination	3° on all axes

Electrical Characteristics**AC6**

Voltage	Nominal	12-24 V
	Minimum	10 Vdc
	Maximum	27 Vdc
Current	Standard	50 mA
	Maximum	500 mA

Working Conditions

Working Temperature	+5°C to +55°C
Relative Humidity (without condensation)	95 %
Storage Temperature	-25°C to +70°C

Accessories

Midi and Mini shield for AC6
(see accessories page)
Reprogramming tools

Range of tools adapted to the requirements of each customer:

- Intuitive, powerful, end operator-friendly software
- Possibility of reprogramming without tools
- Minimum-sized, sturdy tools
- Machine simulators for expert designers

HeUs Software

User software for the Azkoyen validator range

<http://sat.azkoyen.com>

Working test

Reconfiguration of pin outs and validator cloning

Reprogramming of firmware and software

Coin inhibition / enablement

TL20

Handheld programmer.

Permits use of HeUs software without PC

Direct connection kit

PC connection cabling.

Permits use of HeUs straight from a PC

Kit IA 21

Validator power source

* Transformer not included
