

# FrogHub

## Your Cloud-Based Reporting Software

FrogHub stands as our flagship analytics and data dashboard. This cutting-edge tool assists you in making optimal decisions for managing your parking asset, boosting revenue, and enhancing the overall driver experience.

FrogHub is the first customizable dashboard on the market to deliver unparalleled insights into your all aspects of your operational, technical and revenue collection data.

The real-time nature of this data facilitates seamless dynamic pricing and surge pricing adjustments. Additionally, scheduling features allow for editing and customization of rates in advance, minimizing administrative time during peak times and operational hours.

The true beauty of FrogHub is that it's so user-friendly that there's no need for technical support, making it a **hassle-free solution** for your needs.

### Data driven business decisions

Take the hard work out of it, allow FrogHub to assist decision making to help you achieve your revenue goals through all aspects of your technical, operational and revenue collection data

### High data security

Frogparking takes cyber security seriously, and we can help you eliminate threats & downtime. With SSL encryption & storage across multiple cloud-based servers, we have got you covered

### Rates engine

FrogHub facilitates pricing changes in real-time with a few clicks on your mouse. Not only that, you can even pre-schedule surge pricing to keep you extra organized

### Totally customizable

We will design the dashboard to assist your operational needs – alignment to current reporting and focussing on your areas of interest are easy
