

FrogCounter

Frogparking's Answer To Counting Vehicles

When parking sensors are impractical, turn to FrogCounter. Our counters monitor vehicles entering and exiting your parking lot, employing advanced algorithms to ascertain available parking spaces. With the latest laser technology, accuracy is guaranteed.

Accurate detection

We've harnessed cutting-edge laser technology to precisely count and monitor the flow of vehicles coming and going - say goodbye to manual magnetic loops

Ultra-fast

Detection and processing is performed at the unit, meaning only information you need is sent to the cloud

Fully integratable

FrogCounter links seamlessly with a number of other Frogparking solutions, so you can feel confident and in control of your parking asset

Aesthetically pleasing

FrogCounter has been designed to be discreet - say goodbye to off-brand eyesores, and hello to a beautifully crafted solution that is both sophisticated and unobtrusive
