## LTR788<sup>™</sup> Dual Platform Scales

## Individual Tire Weights for Vehicle Inspections and Tire Ratings

## Display Individual Wheel Weights within Dual Tire Configurations \*

Weighing only 39 lb (17 kg), the LTR788™ Dual Platform Scale was created to directly measure tire weights in a dual tire configuration and compare to tire ratings on the sidewall. The fully-electronic, self-contained, low profile wheel load scale can be used in

sets of two to six scales, or alongside single-platform wheel load scales for commercial vehicle enforcement or inspection operations.

The LTR788<sup>™</sup> is battery operated and features a solar panel that offers the advantages of an electronic scale but minimizes the need to manually charge the batteries to maintain the charge. The lightweight and low profile design, with a platform height of 0.86" (22 mm), makes the scale easier to move and for drivers to position the vehicle.

The LTR788<sup>™</sup> is currently the only tool available to enforce <u>FMCSA Regulation 393.75</u>. MCSAP Federal Funds can be used to purchase this tire rating inspection scale.
