

PT 2030

Payment terminal for parking

Smart parking needs smart solutions

Payment Terminal ATB PT 2030 for parking management

Possible applications

The Solar Payment Terminal 2030 provides a cashless, simple and flexible solution to any parking management challenge.

The benefits include:

- Integration into existing payment systems or back offices
- No power supply required - can be used as a temporary solution
- Ticketless: Display shows QR code, which becomes receipt on mobile phone
- Ease of use with customisable touch screen interface
- Low maintenance effort

Payment options

- NFC credit card payment - contactless with PIN entry
- Smartphone payment (GooglePay, Apple Pay, etc.)
- Free parking for employees or customers without a loyalty card - with QR code scan, PIN entry or licence plate entry
- Mobile phone parking app

Where to use

- City and municipal car parks
- Shopping centers and malls
- Corporate car parks
- Event venues
- Hotel and hospitality sector

Highlights

- Clear menu navigation, easy to understand on 7" touch screen
- Mobile phone parking app; connection to Smart Parking eV platform
- Easy upgrade of your parking management
- Acceptance of various cashless payment options:
No cash - more security
