

PAY & DISPLAY MACHINE

2020 MAX

Maximum state of art

Pay & Display Machine 2020 MAX

The new 2020 MAX parking ticket machine sets new standards in convenience, versatility and ease of use. With an 15.4" touch screen and intuitive user interfaces, our machine offers a wide range of functions. Sell event tickets, use it as a payment terminal for the charging station, call a taxi, get information and much more - all from one central location.

Possible applications

The 2020 MAX offers a wide range of applications, displayed on a 15.4" screen.

As our 1256, 2020 and 2030 machines are based on the same platform, it is easy to combine them in a flexible way. This provides greater versatility.

Combined with cashless machines in larger car parks, you can reduce the need for staff to handle cash and increase security - less cash reduces the risk of burglary.

Where to use

- City and municipal car parks
- Shopping centers and malls
- Corporate car parks
- Event venues
- Hotel and hospitality sector

Payment options

All payment methods available:

- Coins and banknotes
- Credit cards and NFC payments
- Mobile phone payments (ApplePay, GooglePay, etc.)
- QR code
- RFID cards and tags
- PIN or LPR online verification and payment

The benefits include:

- Easy to use with customisable touch screen interface
- Integration with existing payment systems and back offices
- Hybrid power supply available to support the environment.
- Ticketless: display shows QR code which becomes receipt on mobile phone

Highlights

- Intuitive user interface with large touch-screen display
- A wide range of functions in a single device
- Easy upgrade of your parking management
- Additional details such as map, advertising space and many others - tailored to your needs.
