

Unlock Efficiency, Enhance Experience, Optimize Revenues

CommuniThings is a leading provider of smart parking solutions, leveraging state-of-the-art Artificial Intelligence (AI) and Internet of Things (IoT) technologies. Our commitment to innovation empowers organizations to optimize outdoor parking operations, enhance security, and elevate the overall visitor experience.

Comprehensive IoT offering

Discover our holistic IoT service-suite, where we generate in-house all forms of IoT detection technologies, ensuring coverage of every conceivable use case.

➡ Smart Surveillance with AI Integration

Harness the power of AI in our advanced camera technology for real-time insights into your outdoor parking lot. Our platform interfaces agnostically with any camera of choice.

COMMUNITHINGS

Transforming Outdoor Parking Management

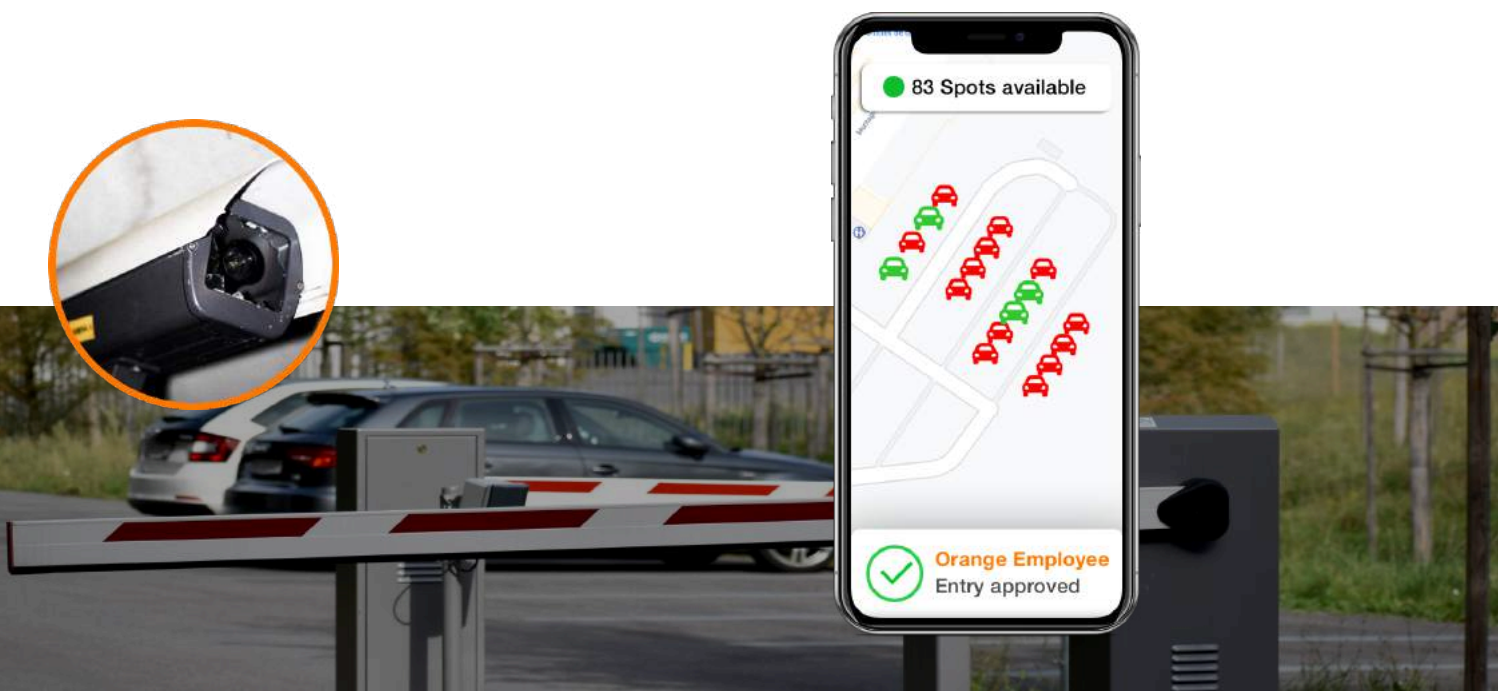

➡ Ground sensors for Real-time detection

Our ground sensors provide accurate and real-time information on parking space occupancy, ensuring optimal space utilization, especially in areas where cameras can not be used.

➡ Access control with ANPR cameras

Ensure precise access control and authentication at entries and exits to your parking lots by integrating ANPR cameras with our parking management platform.

End-user centric solutions

Embrace user-friendly guidance and convenience with our suite of services, ensuring seamless navigation to available parking spots and hassle-free reservation.

➡ Mobile app guidance

Navigate parking effortlessly with our mobile app guidance, providing real-time availability and guidance to the parking spot.

➡ Display panel Integration

Effortlessly locate parking spots at the parking space with integrated display panels, offering real-time availability information for each zone or level.

➡ Electric-vehicle charge-point reservation

Through integration with local charge-points, the mobile app allows users to conveniently check charging-point availability and book chargers in advance.

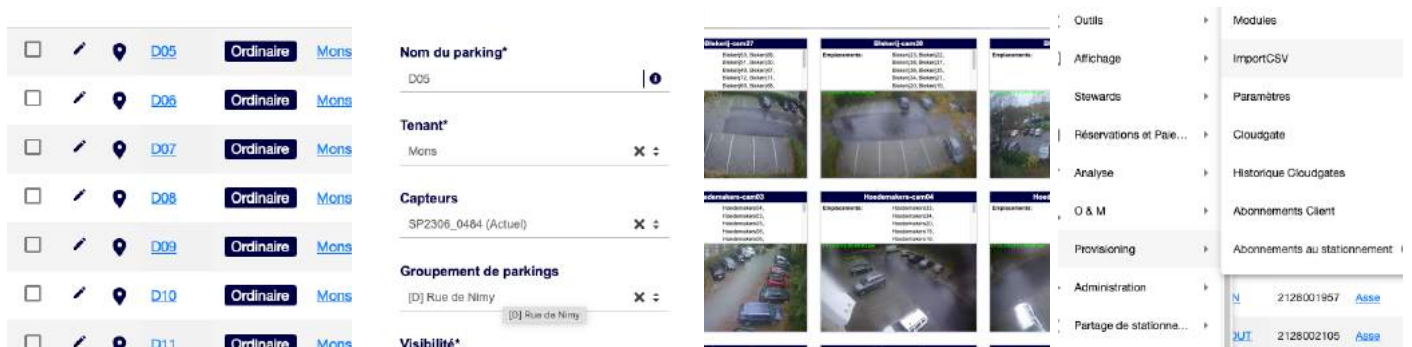

Parking administrator services

Simplify parking administration with a single, comprehensive platform enhancing efficiency and control.

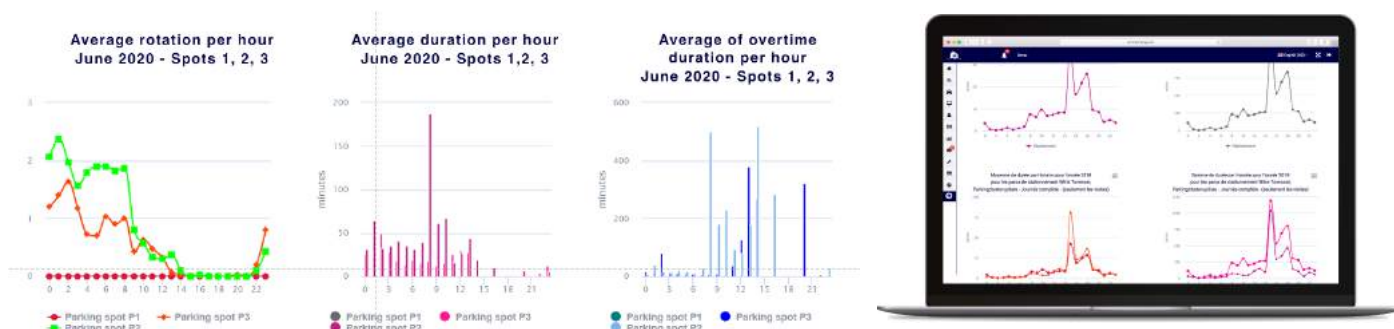

➡ Management dashboard

Streamline management through our dashboard, offering real-time monitoring of parking occupancy, ongoing sessions, and camera status. Effortlessly provision and adapt parking spaces based on dynamic rules with our configurable interface.

➡ Data-Driven Optimization

Make informed decisions with comprehensive parking analytics. Our platform provides insights into usage patterns, allowing for proactive adjustments and improvements in parking space management.

➡ Effortless Enforcement

Enhance enforcement precision with AI and PTZ cameras capturing license plates, enabling accurate monitoring, and facilitating fine generation for streamlined parking compliance.

Why choose CommuniThings ?

Proven Technology

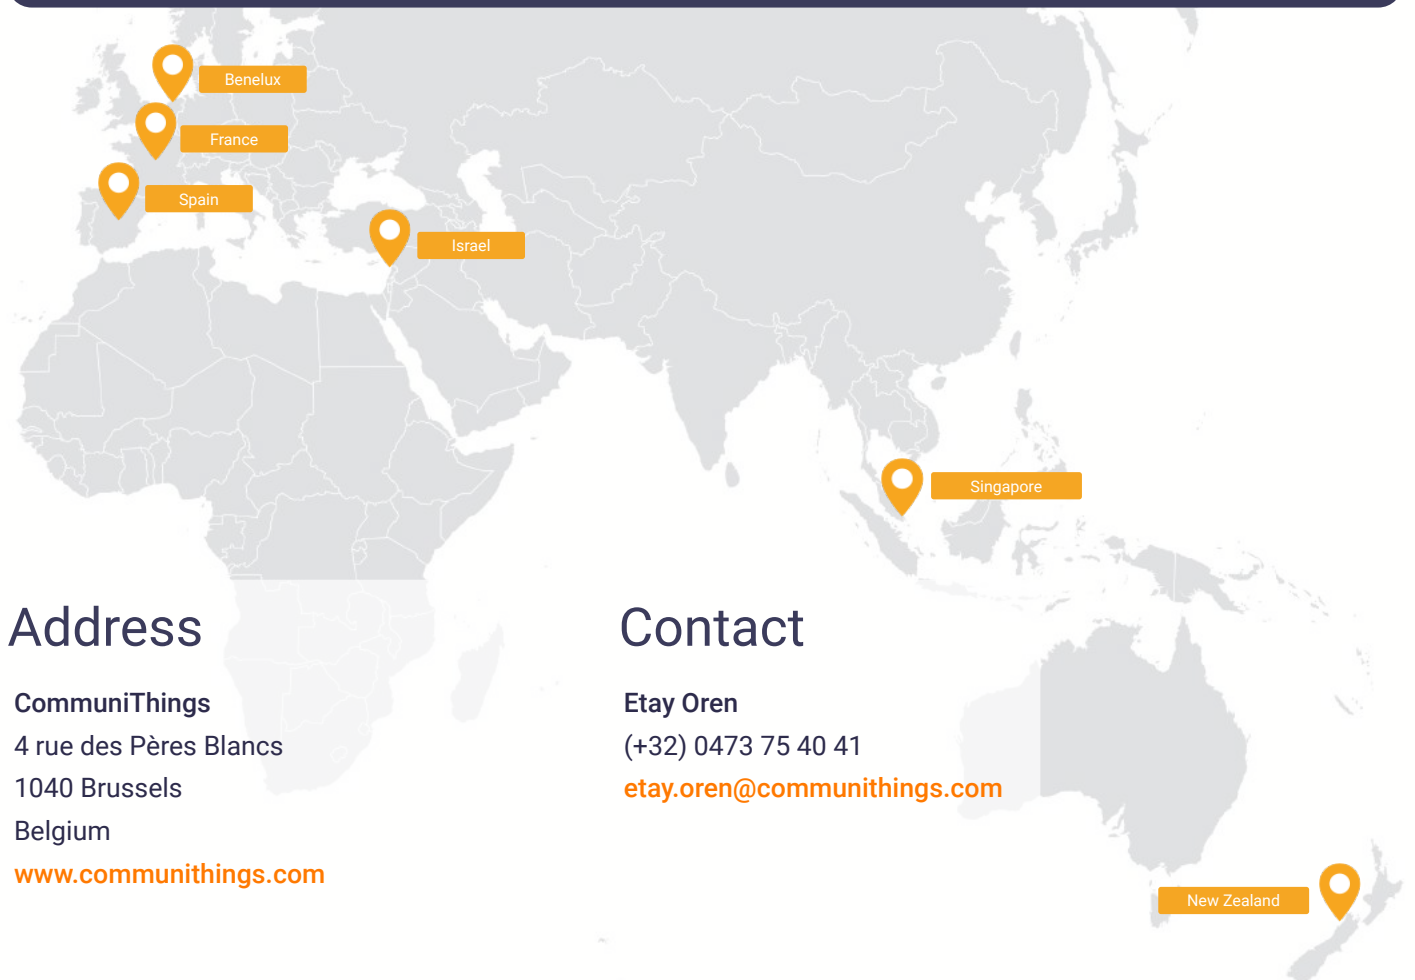

- Utilizing advanced sensor technology and image processing for accurate detection.
- 99% accuracy in varying environmental conditions.

Flexibility and Scalability

- Adaptable to various use cases - resident parking, B2B rental, EV spot-management, reservation, and more.
- Scalable to cover large outdoor parking areas.

Open Ecosystem

- Inegration with open data portals and third-party applications.
