Cord Protector

Cord protectors are perfect for use in the home, office, or industrial areas where cords run across walkways or traffic areas! These electrical cord protectors are constructed of a non metallic flexible black rubber and have slits on the bottom to insert wires for protection. (Some cord protectors require splitting). The cord protectors come in lengths of 5' and 9' for long open areas where cords need protecting. The electric cord protectors can be cut to desired lengths if desired.

Features

- Nonmetallic flexible rubber construction.
- Can be used in the home, office, or industrial area.
- Protects and organizes valuable cords.
- Durable and lightweight.
- Reduces trip hazards.
- Can be cut to desired lengths.
- Available in multiple channels for cord organization.
