Introduction

ACBWJ is a joint venture company based in Belgium, incorporating ACB a well-established high-quality paints and coatings manufacturer and WJ the UK's leading road safety markings contractor and materials specialist.

TOP MARK™

TopMARK™

Preformed Thermoplastic

We have used the strengths of both organisations to produce TopMark a new level of excellence in Preformed Thermoplastic Markings providing a durable option for many highway, car park, industrial and school playground marking applications.

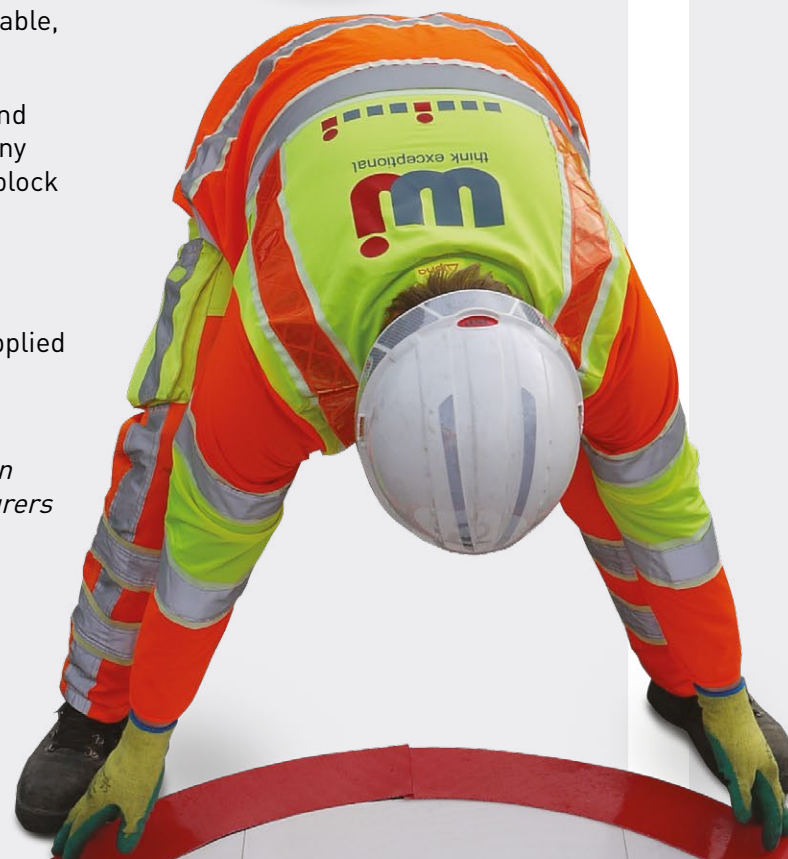

TopMark is supplied in sheets and rolls or precision cut letters, numbers, symbols, lines, arrows, logos or complex designs.

TopMark markings are easy to apply using heat from a simple gas touch to melt in situ onto a prepared surface.

Benefits:

- TopMark is manufactured to the highest quality using the latest technology and an innovative blend of resins and pigments.
- TopMark is extremely durable, flexible and UV stable.
- TopMark can be quickly and easily applied to almost any surface such as asphalt, block paving, concrete, metal and tile*.
- TopMark has good skid resistance and can be supplied in reflective or non-reflective grades.

**Use primer as necessary in accordance with manufacturers recommendations.*

Clean, accurate and quickly applied, without the need for expensive equipment.

Key Uses:

Highway

- Panels, lines, letters, numbers, arrows, triangles, speed roundels and hazard teeth.
- Bus, cycleway and walking man signs and symbols.
- Pedestrian crossings
- Utility reinstatements.

Car Parks

- Car park markings with signage for bays.
- Disabled, mother and child symbols and car charging points.
- Roadway directional arrows, no entry and no parking signage

Education

- School playground markings and educational games.
- Educational number grids.
- Colourful animals and imaginative play designs.
- Cost-effective way to bring fun to your childrens' outdoor activity.

Bespoke

- Company logos
- Industrial safety signs
- Tourist Information
