

WHAT'S NEW AT CONTRALCO?

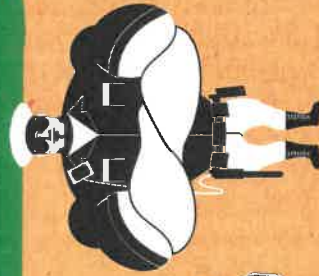

Because **prevention involves training and awareness-raising**, Contralco **designs and offers preventive education kits for addiction problems** in companies.

EDUCATIONAL, PRACTICAL AND PLAYFUL KITS

The kits are composed of a customizable course, simulation glasses and a USB key with a guide for the worker and his **exercises**.

REMINDER!

Using an alcohol breathalyser is still the best way to know your blood alcohol level!

CONTRALCO IS ALSO,

Verification and calibration services are available at Contralco, as well as the sale of the AF 35C ready-to-use electronic breathalyser with 5 check valves, 1 carry bag and the manual in English.

DID YOU KNOW?

Drinking and Driving:
the number one mortality factor on the road!

The effects of alcohol:
increase the reaction time, shrink and deform the visual field, alter the appreciation of distances, reduce reflexes.

The alcohol and the organism:
ingested, it reaches the stomach without chemical modifications, arrives directly in the blood and is diffused in the organism, which absorbs 2 to 3 times faster than it eliminates it.
