

DEVELOPING WORLD-CLASS SAFETY INNOVATIONS

Kelly Bros has harnessed over 60 years of experience to become one of the world's foremost road marking product manufacturers. Our commitment to innovation has driven the investment in our manufacturing facility. This enables us to create some of the best road marking products on the international market, at a capacity in excess of 300 tonnes per day.

RAISING THE BAR ON QUALITY

Here at Kelly Bros we pride ourselves on our commitment to quality products. We have developed strong relationships with trusted suppliers working in partnership to develop proprietary innovations in road marking safety. All raw materials used by Kelly Bros are subject to stringent quality control measures with every batch being tested before it enters our plant.

All road marking products produced by Kelly Bros are manufactured to BS EN 1871 under the BSI Kitemark scheme and meet the requirements of BS EN 1436 to the specified classes.

KELLY BROS MANUFACTURING

PRODUCT RANGE

THERMOPLASTIC

BriteLine 100 a premium, durable thermoplastic, with ultra-bright pigments and high index glass beads. Ideal for the most demanding environments. BriteLine 100 is highly visible, both by day and by night. Available in white and yellow.

BriteLine Plus is our high definition, premium product range. Offering superior performance in both dry and wet conditions, it provides exceptional reflectivity, luminance, durability and skid resistance. Available in white and yellow.

PrimeLine a versatile, cost-effective thermoplastic designed to withstand heavy traffic usage. With excellent levels of reflectivity, luminance and skid resistance it is available in reflective and non-reflective grades in a range of colours.

CreteGrip is an innovative line marking product that adheres to most surfaces including concrete. It is available in reflective and non-reflective grades and in a range of colours.

All products above are available in screed, rib line, extrusion and spray grades and are certified for application in many European and international markets.

ANTI-SKID

ColourTuff a quick-drying, hot-applied thermoplastic anti-skid road surface treatment. ColourTuff is highly visible and ideal for bus and cycle lanes, walkways, car bays and traffic calming strips and is proven to improve safety in busy areas. Available in a range of grades and colours.

KellyGrip the highest performing anti-skid road surface treatment on the market, produced using aggregates exclusive to Kelly Bros in excess of 75 PSV and 71 SRV. Available in Buff and Dark Grey (applied hot or cold).

REPAIR

KellySeal an overband sealant for general applications, made with high PSV, 1–3mm aggregates, polymers and mineral fillers, capable of filling and sealing in one operation. KellySeal is tough, with strong elastomeric performance.
