

## 40 years of road safety system experience

Founded in Brittany in 1976, **Rousseau** Road Safety Systems is an internationally recognized name in metalworking and road safety development. Steady growth in the bridgework sector led to the company's specialization in bridge and viaduct barriers and guard rails. **Rousseau's** focus remains on the design, manufacture, and installation of road restraint systems for vehicles and pedestrians. Our patented products are the hallmarks of **Rousseau's** efficient, professional service and set us apart in a demanding market of ever-evolving regulatory, performance and durability requirements. Today, **Rousseau** is a leader in France for bridge safety structures and the company's renown has grown to include international markets as well.

## Key numbers

- 20,000 **bridgework** installations in France
- 40 **years'** experience
- 600,000 **m** of barriers and guardrails
- 80,000 **tons** of steel used

“DESIGN, MANUFACTURE, INSTALLATION.

**ROUSSEAU** MEETS ALL YOUR PROJECT NEEDS WITH THE SAME CARE AND PROFESSIONALISM WE'VE SHOWN OUR CLIENTS FOR FORTY YEARS.

OUR EXPERTISE AND COMMITMENT TO RESPONSIVE SOLUTIONS HAVE MADE **ROUSSEAU** A TOP NAME IN ROAD SAFETY SYSTEMS. ”

## High-performance, robotized production line

An ambitious, visionary investment policy has played an important role in the development of **Rousseau's** manufacturing equipment. Our machinery has been fitted with the latest robotic tools to continually improve quality, shorten delivery times, and always benefit the client.

### Our strengths

Full-service project management from design to installation

- CRM technology to shorten response times and enhance client relationships
- Customized solutions for all projects, large or small (rural, urban, suburban, motorway)
- Careful attention to specifications furnished by project managers and architects
- Single-facility, local production that shortens delivery times
- 10-year warranty on hot-dip galvanized steel NF EN ISO 1461
- QualiSteelCoat quality label coatings for protection and aesthetics
- Robust logistic network for fast deliveries all over France
- "Straight-off -the-line" container shipping for international orders

## Consulting services and technical proficiency for new and renovation projects

As an independently owned and operated company, **Rousseau's** strengths lie in the skills and experience of its personnel. Each department is staffed by experts in their given fields. The latest generation of talented Rousseau employees strive to ensure that decades of valuable experience and skills endure within the company's practices. Our low turnover rate highlights the level of trust that exists within the company and helps us serve our clients better.

### Design and engineering

Building on our strengths

**Rousseau's** integrated engineering department delivers technical solutions tailored to road safety project drafts submitted by project managers and supervisors. Project engineers examine the element installation parameters, perform site feasibility studies, and ensure all regulatory standards are met.

### Production

Tapping into the power of robotics

A team of experienced welders and an industrial production line are the integral elements of the 4,400 m<sup>2</sup> workshop, which is adjacent to 45,000 m<sup>2</sup> of storage.

Areas of expertise:

- crude steel plasma cutting (sawing)
- plasma stamping and shearing
- manual welding for smaller automated series

Quality control is performed at each of the manufacturing stages according to **Rousseau's** own Quality Assurance Guarantee.

### Installation

Ensuring on-site quality standards

Our road restraint systems and guard rails are installed by a team of specialized personnel who remain in constant contact with the project foreman. The highly-competent specialist teams follow strict procedure guidelines to respect the quality, safety, environmental and deadline requirements of our clients.

## Operations

- **Railway Stations**  
overhead  
wire and shaft protection  
service guard rails
- **Urban railway station landscaping**  
architectural guard rails,  
disabled hand rails, stainless  
steel mesh fencing...

- **Rural bridgeworks**  
standardized S3, S7, S8  
guard rails

- **Urban bridgeworks**  
architectural guard rails  
steel, stainless steel, wood

- **USES**
  - Road
  - Rail
  - Pedestrian

- **LOCATIONS**
  - Industrial
  - Business
  - Public

- **JOB TYPES**
  - New construction
  - Renovation
  - Maintenance
  - Repair

- **Two-lane roads**  
NF road restraint systems:  
BN1-BN2, BN4  
Dual guard rails

- **PROJECTS**
  - Civil engineering works :  
road bridges,  
foot bridges,  
viaducts
  - Train and tramway stations

- **Footbridges**  
wood and steel, steel  
and stainless steel,  
metalized steel

- **Motorway installations**  
CE road restraint systems:  
Ovalie H2, H2+ et H3.  
GBA transitions

- **Manufacturing Site Lanrodec (Brittany/France)**

#### CLIENTS

- Public works and civil engineering
- Communities and public groups
- Motorway construction
- Metalworking
- Manufacturing

● Acoustic barrier
