

Creative and decorative markings

Why not use DecoMark®
- for decorative marking on a more permanent basis?

DecoMark® is ideal for special designs, such as company logos and games

Living playgrounds with a creatively designed surface

*A fun way
to learn the
numbers in
the school
playground*

Imaginative play

DecoMark® is an easy option when school or municipal playgrounds need refreshing with a colourful surface. The decorative games encourage the children to be active whilst having fun.

Active and safe learning

The playground games can be designed with spelling and mathematical themes, providing an alternative and fun method of learning. The high friction in the DecoMark® material minimises the risk of the symbol being slippery, and the children can play safely.

For displaying company brands

Company logos or symbols

Branding, image and service are important parameters for companies and organisations. DecoMark® offers a different approach for branding parking places and the entrance to your premises. Use your company logo or symbol to welcome guests and clients, and at the same time promote your image.

By marking with DecoMark®, the message gets across before entering the building.

Here, the company logo marks the parking spaces in a striking manner

Decorative and architectural markings in public areas

Decorative thinking

DecoMark® gives freedom to design the public area differently, and you get the ability to brighten the environment.

Designing surfaces

Take the surface into consideration when designing and planning new blocks of flats, city areas, parks and schools. Or think DecoMark® when guiding tourists around your city.

The flexibility of DecoMark® enables you to be creative with your designs.

The idea of DecoMark® is quite simple: You name it – we make it!

Make the horizontal surface beautiful

To look at dark and boring surface is not an inspiring way of living. So why not put colours at the surface and make it more special and beautiful? DecoMark® provides solutions for individual and special designs of logos, games and much more. Your imagination is the only limit!

Colourful with high UV resistance

DecoMark® is available in a great variety of standard colours, which makes it easier to design decorative and inspiring signs and symbols. The colourful DecoMark® symbols spread happiness and inspiration to everyone. So get the DecoMark® standard colour scheme and start designing! Moreover, the composition of the thermoplastic DecoMark® marking makes the UV resistance high. Therefore, the colours stay bright and shiny for a long time.

Flexible and durable

Smaller details and curving shapes are possible with flexible DecoMark®. Although DecoMark® is a thin material, it is still a durable solution when decorating the surface. This gives you years of benefit from your creative designs.

*DecoMark® is perfect for
games in school playgrounds
and recreation grounds.
Why not involve the children
in the creative phase?*

DecoMark® is unproblematic to order and fast to apply!

Individual DecoMark® symbols are unproblematic to obtain

DecoMark® is easily available in special and individual designs. Our modern flexible manufacturing facilities enable us to react quickly to special requests. The experience and expertise also enables us to provide high-quality, flexible, simple-to-apply DecoMark®.

Fast application

Application is fast and simple because application requires only one person, a broom and a gas burner! Sweep off the surface, apply the DecoMark® and use a gas burner to fix in place, 'fusing' the material to the road surface. It's that simple. In other words, no major traffic management or machinery is needed for the installation of DecoMark®.

DecoMark® Easy

Some symbols and markings are made as DecoMark® Easy, where the backside of the marking is glued with a compatible material making it convenient and easy to use. It gives easier control over the complex signs and saves application time, when laying complicated signs.

Environmentally friendly

DecoMark® emits no environmentally harmful substances, either during, after application or at the time of removal. The pigments are organic and do not contain lead or other heavy metals.

Be decorative with
DecoMark®

Representative:

Easy system

With the Easy system, loose DecoMark® parts and different colours are physically adhered with a compatible material. The adhesive backing enables easier control over the complexities of the design and saves application time when laying complicated games.

Easy application and Easy to handle
