

An Intuitive and Simplified Parking Management Solution

The **ClevercitiCockpit** delivers access to real-time parking data to simplify operations and reduce parking complexity. The integrated smart parking management platform is a cost-effective solution to increase parking revenues and improve the overall driver experience.

Get a complete overview of your organization's parking activity, delivering on-demand data through an intuitive, Web-based platform. ClevercitiSensors transmit real-time data to the cloud where it is immediately available in the ClevercitiCockpit. Through rich analytics, parking operators receive deep insights into the utilization of their parking assets, enabling decision-making that increases revenues and customer experience.

Valuable Data

Access to live control and occupancy data to enable better decision making based on real facts.

Increased revenue

Generate additional revenue by optimizing the usage of the space dedicated to parking, and by adapting the pricing dynamically.

Optimized Enforcement

Reduce the cost of enforcement by prioritizing the areas to verify. The Cleverciti Cockpit lists areas with the greatest violations, and automatically notifies

Real-time parking data simplifies your parking operations and offers a cost-effective solution to increase parking revenues and improve the overall parking experience of your customers.
