## City-Trailer

The Multi-Tool among road safety trailers

Our City-Trailer was developed for the special requirements on trailers in urban areas, as well as for the use on federal and rural roads. The City – Trailer is a multifunctional vehicle which can be used as VMS trailer as well as cargo vehicle for safety material.

- ✓ **special LEDs conforming to class B7 as concerns radiation (according to EN12966) allow best visibility even on short distances , see illustration on bottom of page 153**

- ✓ **cargo bed with lashing rails ensure flexible and secure transport of further equipment**

- additional warning effect due to two or three advanced warning lamps, confirming to German TL
- starting and operation can be carried out while driving
- animated pictures and texts can be shown at the same time
- display of static, dynamic, flashing and alternating symbols and signs
- 9 brightness levels and automatic light intensity adjustment via photo cell

### LED board

- each board 1,010 x 1,010 mm
- full colour RGB with up to 16,7 million colours

### Chassis and equipment

- electronic lifting and lowering device
- 3 lashing rails for cargo securing
- floor made of skid proof, extra - strong lined plywood, waterproof

- ✓ **versatile use due to possibility of displaying most of the common traffic signs**
- ✓ **guidance and / or warning of road users**
