# PARKING AS IT SHOULD BE.

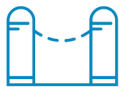

## SMART PARKING PROTECTION

Parklio™ Smart Parking Barrier secures your parking place and allows you to control it with a smartphone APP and share it with your friends.

Parklio™ Bollard helps to ensure a high level of safety of driveways, buildings, and enclosed territories.

Parklio™ Chain operated by a smartphone allows protection of driveways, parking spaces, and wide access areas.

Parklio™ Gate offers reliable control, security, and durability. A wide range of arm lengths makes an automatic gate barrier applicable to any parking entry and exit.

## SMART PARKING SOLUTION

Parklio™ ANPR system enables automatic detection of vehicle licenses and ensures highly secured, automatic access for specific users.

Parklio™ Parking Management System enables centralized control and management of smart parking products through a user-friendly interface.

Parklio™ API enables the integration of Parklio™ solutions with any other system. It will help you to optimize occupancy, reduce the operational cost and enhance functionalities.

Parklio™ Brain turns any of your existing parking product into a smart one.

Parklio™ Gateway enables remote control and real-time communication between the products and the users.

Parklio™ Detect is an intelligent AI system for parking monitoring, analyzing, and reporting vehicle parking data in both off and on-street parking.

## WHY PARKLIO?

### REAL-TIME DATA AND ANALYTICS

Parklio gives you the insight you need to optimize your parking and improve your business practices.

### MAXIMIZE PARKING REVENUE

Protect and raise the value of dedicated parking spaces.

### WEB-BASED PARKING MANAGEMENT

Improve traffic flow and customer experience.
