Citilog CT-Center Client

Operating video analytics solutions

Operating video analytics

Citilog CT-Center Client is a system operation software for Citilog's Incident Management and Traffic Statistics solutions. It is a powerful tool for operation and management of analytics solutions.

CT-Center Client is designed to make traffic operations more efficient.

Technology

CT-Center Client's graphical user interface benefits from 20 years of field experience with traffic operators around the world research, innovation and continuous improvement.

It is optimized for the operation of analytics applied to Traffic and Intelligent Transportation Systems.

Benefits

CT-Center Client is a video-centric tool. The information is presented in a simple and concise manner which facilitates day-to-day operations.

The unique design automates all processes that can save time for the operators, enabling them to focus on efficiently responding to traffic emergencies.

EFFICIENT OPERATIONS

Elaborate tools for filtering only relevant alerts for operators

Use historical data to improve performances and efficiency of operations

INTUITIVE GUI

Traffic-operation centric design

Straight forward presentation of alerts for quick and efficient incident management
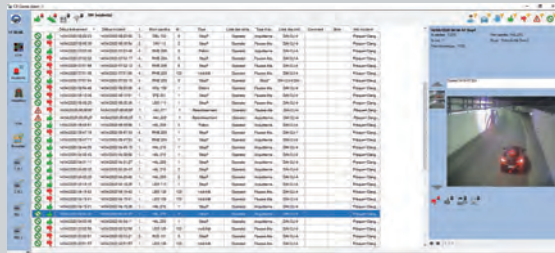

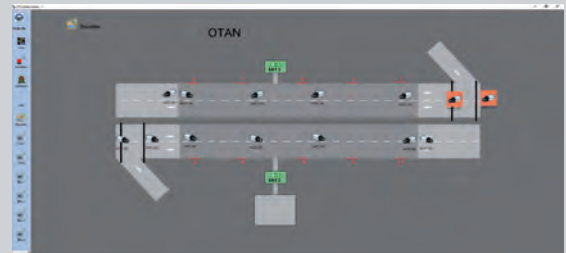

SIMPLIFYING OPERATIONS

Enables seamless operation of large systems

Review in a glance all data and video recording relevant to managing an incident

Focus on most critical cameras

Operators in Traffic Control Centers need to focus on efficient incident response.
CT-Center Client enables an intuitive and seamless operation of the video analytics system that saves time and resources while enhancing efficiency of incident response.

Because a picture is worth a 1000 words, **CT-Center Client** is a video-centric tool. The information is presented in a simple and synthetic manner which facilitates operations. The GUIs can easily be personalized and tailored to specific needs.

Maintaining the performances of a video analytics system over the years is paramount to ensure that the information presented to traffic operators is accurate. **CT-Center Client** offers tools to record events and data in order to operate with the highest accuracy over time.

Citilog CT-Center Client is a traffic-centric & comprehensive Graphical User Interface for day-to-day Incident Management and Traffic Statistics solutions. It benefits from more than 20 years of experience in video analytics.

Technical specifications

Hardware requirements	**CT-Center Client** can be installed on standard Windows-based computers
SDK	Events, alarms, status and data displayed on **CT-Center Client** are available to 3rd party systems using **CT-SDK**

Architecture

CT-Center Client can be installed on any Windows-operated computer or Virtual Machine.

The Graphical User Interface of **CT-Center Client** displays data generated and received from **CT-Center**.
